

Fraenkel diamonds

- JEWELRY -

Ethically made
& fairly priced
fine jewelry

We are a family-run direct-to-consumer company, based in Antwerp, Belgium, the diamond capital of the world. We have been in the diamond and jewelry business for over sixty years and are now in its fourth generation.

We believe in ethical business and design. Our diamonds are lab-grown, chemically and optically equivalent to mined diamonds. The only difference is the stand we take to protect the planet and its citizens.

All of our jewelry is handmade and our gold is of the highest quality (18K).

CRAFTSMANSHIP & DESIGN

Engagement Rings & Wedding Bands

We believe every engagement ring and wedding band should be unique, like the diamond itself. We work with you to handcraft each piece based on your preferences.

Please contact us at info@fraenkeldiamonds.com for a personalized consultation.

Laboratory-grown diamonds have the same chemical composition as that of mined diamonds. They share the same 4 C's: color, clarity, cut, and carat. The most respected diamond grading laboratories in the world: GIA, HRD and IGI, all provide diamond grading reports certifying that laboratory-grown diamonds are made via the same physical processes as are mined diamonds. We are providing the same high quality stones, at a significantly lower cost to you and to the earth. Laboratory-grown diamonds should not be confused with cubic zirconia or synthetic moissanite, which only look like diamonds but have very different chemical and physical properties. Laboratory-grown diamonds have the exact same scintillation, flash, fire, and brilliance as mined diamonds. Carbon is carbon. But let's not pollute our beautiful world with it.

All prices are subject to change without notice and are not guaranteed, except that prices for an order that have been accepted by L. FRAENKEL & SON BV are not subject to change after acceptance. Prices are excluding VAT and other taxes, duties and/or charges, unless explicitly otherwise agreed upon in writing.
